

## **iOS DEVELOPER**

For a mobile driven logistic cloud platform focused on the European and North American transportation and logistics sector, we look for a new colleague to join our team. If you're passionate about automotive and truck industry, this is a cool project to be part of.

We need someone that will take care not only of the app development process, but also who will have to pro-actively solve the impediments that occur (yes, these situations are part of the deal).

### **You must:**

Actively participate in the mobile project definition process, next to our clients

Work with the team to troubleshoot and debug existing application software

Rigorously educate yourself with the latest development techniques and best practices

### **Ideal you should have:**

Relevant experience in iOS Mobile application development (please provide app references)

Strong understanding of the software delivery process and lifecycle

Experience using X-Code tools, Objective C, C/C++, Cocoa

Previous experience with Mobile Applications Testing and Development

### **Considered a plus:**

Have sense of humor

Know to play Ping – Pong

(Like drinking a beer on Thursday)

### **What we can offer:**

Best private medical insurance (trust us we have it – Sanaplan from Allianz – Tiriac)

Good office location

Competitive salary

If you got to read all the lines above, there is a chance that we've caught your attention.

Come to meet us and drink a coffee. Send your availability here: **hr-ro@xlfamily.com**
